PROFESSIONAL SUMMARY

Detail-oriented Software Test Engineer with **1 year of industry experience** in manual and automated QA across web and mobile platforms. Proficient in **Selenium WebDriver, TestNG, Cucumber (BDD), Playwright**, and **Apache JMeter**. Proven ability to design end-to-end test strategies, build scalable automation frameworks, and enhance product quality in Agile and Scrum environments. Strong background in API test automation, CI/CD pipeline integration, and cross-functional team collaboration.

PROFESSIONAL EXPERIENCE

Profcyma Solutions Pvt. Ltd. — Software Test Engineer Pune, MH | June 2025 – Present

- Designed and executed **300+ manual and automated test cases** for web and mobile applications, ensuring **zero critical defects** in production across multiple sprint releases.
- Developed a **Selenium WebDriver + TestNG + POM** automation framework, reducing regression cycle time by **~40%** and enabling faster release validation.
- Designed **API test automation** using Postman and JavaScript to validate REST endpoints, status codes, and schema integrity, uncovering critical defects pre-production.
- Created Apache JMeter performance test plans simulating **500+ concurrent users**, identifying 3 major bottlenecks and improving API response time by **~30%**.
- Integrated automated test suites into **CI/CD pipelines**, improving release efficiency and reducing manual testing effort by **25%**.

TECHNICAL SKILLS

Testing: Manual Testing, Functional Testing, Regression Testing, UI Testing, Cross-Browser Testing, API Testing, Performance Testing

Automation Tools: Selenium WebDriver, TestNG, Cucumber (BDD), Playwright, Page Object Model (POM)

Performance Testing: Apache JMeter (Load and Stress Testing)

Programming Languages: Java, JavaScript

API Testing Tools: Postman (REST API, Status Code Validation, Schema Validation)

Tools & Version Control: JIRA, GitHub, Microsoft Excel, Git (Branching, Pull Requests)

Methodologies: Agile, Scrum, CI/CD Fundamentals, Defect Lifecycle Management

PROJECTS

DRIWE – Cab and Courier Booking Application | Mobile Testing · API Testing · JMeter · JIRA 2025

- Tested a dual-module mobile application (DRIWE User & Driver) covering booking flows, GPS tracking, and trip-completion workflows across both user personas.
- Conducted API testing via Postman to validate ride requests and trip-status updates, identifying **critical data-mapping defects** before production release.
- Performed load testing using Apache JMeter, detecting a server-timeout defect prior to app-store submission; managed defect tracking in JIRA to streamline QA-Dev communication.
- Performed regression testing across Android and iOS builds after each incremental release, ensuring consistent cross-platform behavior and stability.

Grosido – Grocery Delivery Application | Selenium · Manual Testing · JIRA 2025

- Tested a multi-module platform (Customer App, Admin Panel, Delivery Boy App), identifying **high-priority defects** in product listing, cart functionality, and payment workflows.
- Automated end-to-end order processing using Selenium WebDriver, significantly reducing manual regression effort and ensuring data consistency between UI and backend systems.
- Ensured **100% data consistency** between user-facing interfaces and admin dashboards through systematic cross-module validation testing.
- Conducted smoke and sanity test cycles after every sprint deployment to verify critical user journeys remained stable under rapid iterative releases.

EDUCATION

SIPNA College of Engineering and Technology

Bachelor of Engineering, Information Technology – Aggregate: 79%

Aug 2020 – June 2024

Amravati, MH
